Reclaim Education

Notes on the global student movement

After the "Global Wave" is before the "Global Wave"

Most of you probably noticed how the "Global Wave of Action for Education" unfolded since it kicked off on October 7 with rallies, sit-ins and other actions across the U.S.A.

It was followed by mostly massive protests against the increasing privatisation of education and for free emancipatory education in Italy (Oct.8 - now), the Ukraine (Oct.12/Nov.11), Austria (Oct.19/20), Indonesia (Oct.20), Ireland (Nov.3), Nepal (Nov.15 - now), the Philippines (Nov.19-Dec.1), Canada (Nov.24) and Chile (Nov.30). Of course November 17 as the "Global Day of Action" with actions in California,

Lisbon, Manila, Monrovia, Nawan-shahr, Ottawa, Vienna, Skopje, Yogyakarta and cities across Germany, Italy and Poland marked a highlight of the "Global Wave" as well.

During the protests in the past two months hundreds have been detained and were injured by the puppets of the state (the police). Many risked and sacrificed a lot. To take a look at the faces behind the protests check out the complete list of reports with many pictures and videos: www.emancipating-education-for-all.org

The flow of information on activities on the global level has definitely improved in the past few months and

weeks. Furthermore the "Global Wave" brought people worldwide closer together. But the actual coordination efforts between for example protests on the Philippines and the UK is something to focus more on in the future.

During the last international chat meeting participants already began to discuss plans for the future. There are mainly two approaches. On one hand we could focus on reorganising the structures of the ISM platform, for example by coordinating regional meetings (e.g. South East Asia, Central America, Central Europe, Eastern Europe, etc). On the other hand there

are ideas to call for a "Spring of Resistance" next year (March-May 2011).

Both ideas will be discussed further during the next chat meeting scheduled for December 12 at 3pm GMT/10am EST on <http://ism.speege.com>. Many people have observed the recent struggle for free education around the world, but the challenge to bring the various activists, groups, networks and movements together remains. The capitalist economic system unleashes its forces globally, therefore we also need to get organised and strike back globally!

About this newsletter

This newsletter is part of the communication infrastructure of the independent platform "International Student Movement" (ISM). The ISM is being used and shaped by education activists and groups around the world who are struggling against the increasing privatisation of public education and for free emancipatory education for all.

This newsletter is the result of voluntary work done by a few individuals who are passionate about this issue. The positions expressed are not in any way representative for any group or the "International Student Movement" as a whole.
